

46MnVS3 All

General Information

46MnVS3 is a micro-alloyed steel suitable for forging where no further heat-treatment is necessary. SB9850 is treated to give excellent machinability. Two available variants are SB9850 and 382K.

* Designation followed by "*" is not an official EN standard grade but named according to the rules in EN 10027.

Similar designations

SB9850 - S620*, 1.1305

Chemical composition

Variant	Cast	Weldability		C %	Si %	Mn %	P %	S %	Cr %	Ni %	Mo %	V %	Ti %	Cu %	Al %	N %

		Round bar	51 < 90	540**	775-890	16	-	235-270 HB
46MnVS3 EN 10267:1998 (ref)	+AR	All formats	-	450**	700-900	14	30	-

$R_{p0.2}$ * R_{eh} ** R_{el}

The limits for 46MnVS3 are valid for bars after controlled cooling. Forging will increase yield and tensile strength and decrease elongation and reduction of area.

SUSTAINABILITY-ENVIRONMENTAL IMPACT DATA

At Ovako sustainability and reduction of our environmental impact is a major focus in everything we do.

Further information is found [here](#).

In many international comparisons the crude steel Scope 1-2 emission is a key parameter, ie. the CO₂ emission from the steel works itself.

As of 1 January 2022 we carbon offset all our scope 1 and 2 volume shown below.

Steel works	Hofors	Smedjebacken	Imatra
CO ₂ e/kg	120	62	76

To get the full picture of our products environmental impact we have to look at all of our CO₂ emission sources.

Not only the steel work Scope 1-2 itself, but all operations downstream in our production, heating and heat treatment furnaces etc (full scope 1-2) as well as all the emission from input material, eg. alloys, scope 3.

Steel Grade	Format	Condition ⓘ	Scope 1-3 (CO ₂ e kg /1000 kg steel)	Climate compensated Net emission = Scope 3 (CO ₂ e kg /1000 kg steel) Scope 1 - 2 = 0 (compensated)
382K	Round bar	+AR	587	190
382K	Round bar	+N	592	191
382K	Tube,wall	+AR	602	199
382K	Tube,wall	+N	612	200
SB9850	Flat bar	+AR	501	226

As of 1 January 2022 we use carbon offset for all our scope 1- 2 emissions, so in practice the climate compensated data is the same as the full Scope 3 level.

All above data are to be seen as typical values for the specified format and condition. Detailed information about your specific product please contact your sales contact.

Other properties (typical values)

Youngs module (GPa)	Poisson´s ratio (-)	Shear module (GPa)	Density (kg/m ³)
210	0.3	80	7800
Average CTE 20-300°C (µm/m°K)	Specific heat capacity 50/100°C (J/kg °K)	Thermal conductivity Ambient temperature (W/m°K)	Electrical resistivity Ambient temperature (µΩm)
12	460 - 480	40 - 45	0.20 - 0.25
